The Feinberg Graduate School is the educational arm of the Weizmann Institute of Science. It was founded in 1958 with the support of the United States Government. The School is named after Abraham Feinberg LL.B. (U.S.A.), founder and first Chair of its Board of Trustees. The main task of the Feinberg Graduate School is the advanced training of new generations of creative and original researchers in the Natural Sciences and Mathematics, or, in other words, the education of future scientific leaders.

Since its founding in 1958, the School has been a recognized institution of higher learning both in Israel and in the U.S. (It received a charter granted by the Board of Regents of the State of New York). The instructors and advisors of the Graduate School are generally members of the scientific staff of the Weizmann Institute of Science. Currently, there are over 1,000 students, with a student-teacher ratio of 3:1, allowing considerable individual attention. The official language of instruction of the School is English. This enables foreign students to participate fully in all of the School’s programs. The School admits students of any race, gender, color, nationality, and ethnic origin to all the programs, privileges, and activities generally accorded or made available to students at the School. As students are expected to devote all their time and effort to their studies and research, they are eligible for financial support that is generally adequate to cover living costs in Israel. There are no tuition fees.

The School offers programs leading to the degrees of Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.) in Physics, Chemistry, Life Sciences, Mathematics and Computer Science, and Science Teaching. Interdisciplinary programs are also available. The School is headed by a Dean, who is assisted by a steering committee consisting of the Chairs of the Boards of Studies. The Graduate School Office, headed by a Director and Academic Secretary, coordinates the operations of the School. The studies in each discipline are supervised by a Board of Studies, which issues detailed guidelines for its academic requirements for each degree. The Chair of each Board of Studies coordinates all activities in his/her discipline including: courses, admission of students, and evaluation of their research and studies. In addition to the degree programs, the School administers the Postdoctoral Fellowship Program that supports postdoctoral fellows who join the Institute for a limited period of 1-3 years. Currently, there are over 250 fellows in this program.

Dear Graduates,

It gives me great pleasure to congratulate you on this extraordinary day in your lives, and in the lives of all those who have watched you grow, mature, and develop into fine young scientists. As a researcher myself, I know all too well how difficult it is to juggle the many responsibilities inherent in the demands of a scientific career and family life. I am proud of your achievements, and you have every right to be proud of yourselves. My congratulations, too, to your Faculty advisors, parents, spouses, and friends, for their unwaivering support and encouragement during these rigorous years of study. Clearly, they share in your successes.

We all owe thanks to the Feinberg Graduate School’s faithful supporters, whose friendship for the School has played a major role in its development, and who work in partnership with the School and with the Institute to educate the scientists of tomorrow.

Today, you comprise the newest members of a select club: Weizmann Institute graduates. As such, you constitute a human resource of inestimable value. Your careers may flourish in academia, as you set up your own laboratories, make important new discoveries, and mentor the next generation of scientists. You may apply your newfound knowledge to industry and other applied fields, adding your name to patents and inventions. You may parlay an innate business sense into a start-up company, or even leave the world of science altogether, to explore other vistas.

Those of you who work or study in Israel fuel the country’s knowledge-driven economy. Those who choose to travel, whether temporarily or permanently, serve as our “good will ambassadors” abroad. All of you add to the ever-growing pool of world-class scholars.

But wherever your paths may lead, in whatever country you may choose to put down roots, it is my hope that the knowledge and experiences you gained while on campus will be used to serve humanity. The world needs people like you, with your energy, enthusiasm, and creative ideas. I am convinced that you can make a difference.

With best wishes,

Prof. Daniel Zajfman
President, Weizmann Institute of Science

Though your years of study at the Weizmann Institute are ending, I hope that you won’t lose touch with us. We want you to stay connected with the Institute as active alumni, and hope to see you here on campus often.

Dear Graduates,

The conferment of academic degrees is a significant occasion in your lives, differing in essence from previous graduations when you received your high school diplomas or your Bachelor's degrees. If you are completing your studies, this is likely to be the last ceremony in which you find yourselves in the midst of a large group of fellow graduates. You now begin the first chapter of your professional lives. From this point onward, neither your school, your university, nor your graduate school will provide a protective cocoon. Your career path may not be obvious, and you will no longer be on campus where advice is readily available. From now on, your decisions will be largely your own, often made without advisors, mentors, or partners in either success or failure.

Nonetheless, the Feinberg Graduate School is not saying farewell to you today. Your experiences at the Weizmann Institute will continue to be a part of you. Professionally, the standards, values, and ideals that you have acquired during your studies here will continue to serve as strong ethical guidelines. Just as important are uncompromising honesty in research and business practices, and a firm commitment to the absolute severance of personal from professional interests. As a Feinberg School graduate myself, I can also attest to the personal dimension: the images of your research advisors and your fellow students will remain with you for decades. You will recall fragments of conversations, both scientific and personal, as you stand at various crossroads in your lives. These will all continue to inspire you, as will pleasant memories of this special period of creativity, camaraderie, and youthful energy.

I wish you the very best of luck in the future, and hope that we will be able to maintain both personal and professional contact in the years to come.

Dear Graduates,

The ceremony at which you are awarded your degree is an exciting event for you and your family, as well as for the faculty members of the Weizmann Institute of Science, who have accompanied and promoted your professional and personal growth while you studied on our campus. Congratulations on your achievements.

This milestone occasion marks the conclusion of a significant period in your life, and now you face the challenge of considering where you go from here. We have attempted to open the world of scientific and computational research to you, and to provide you with the knowledge and skills that will enable you to pursue a career in any field you may choose. I have no doubt that your Feinberg Graduate School degree will open up wide vistas for you.

Many of you will decide to continue to do scientific research, whether at the Weizmann Institute of Science or elsewhere. If you choose an academic career, the tools you acquired here will certainly be put to good use, especially those that enable you to study and understand scientific subjects, to identify the limits of current scientific knowledge, and, above all, to be able to generate theories, to ask questions, and to plan the experiments required to expand human knowledge. Others of you will choose to become a part of different sectors, public or private, or will change direction altogether. Even then, I am confident that your studies will provide a valuable foundation for your future.

While many of you are likely planning to join established academic or other institutions, I would like to encourage you to take a different perspective on your careers. I hope that those who have not only talent but also courage and initiative will contemplate another path. The beginning of one's career is actually the ideal time to try and create something out of nothing, by launching a start-up company, for example. Quite a few companies well-known in Israel and abroad were founded by young people at your age. Of course, as large as the opportunity is, so is the risk; but nothing compares to the fulfillment that stems from accomplishment based on enterprise and daring.

In conclusion, I wish you success and satisfaction in all your endeavors. Remember that the Weizmann Institute of Science is and wishes to remain a warm home to its students and alumni. Please stay in touch with the faculty and administrators. They will be happy to help you in whatever way they can, now and in the future.

With gratitude to the supporters of the graduate studies program at the Weizmann Institute of Science

The Weizmann Institute of Science and the students and staff of the Feinberg Graduate School are grateful to our many friends throughout the world who have generously funded our graduate studies program.

Scholarships are precious gifts – in essence, gifts of knowledge. They enable our students to concentrate on their studies, freeing them to devote their full energies to coursework and laboratory research. This steadfast encouragement has borne fruit in the many research scientists all over the world who began their careers at the Weizmann Institute of Science. Today’s graduates are tomorrow’s scientific leaders.

הענקת התואר האקדמי היא אירוע מכונן, אשר שונה במהותו מאירועים קודמיםحياء, כדוגמת סיום הלימודים בבית הספר התיכון, וסיום התואר הראשון באוניברסיטה. למעשה, זה כנראה הטקס האחרון בו הינכם ניצבים בקרב קבוצה גדולה של בוגרים ובוגרות, וזאת הודות ל-psychological וינטזמה ש启示 את הפרק "ה האישי" ופתוחת את הפרק "ה יחידני" בחיים המקצועיים. מכאן ואילך, בית הספר, האוניברסיטה או מדרשת פיינברג לא יעמדו לימינכם במתן עזרה והענקת תנאי חממה. גם מסלול ההתקדמות איננו ברור מאליו,不可或וח עם בוגרים ובוגרות של מחזורים קודמים. מנקודה זאת והלאה ההחלטות הן אישיות, ללא מנחים ולהצלחה, או, לחילופין, שותפים לכישלון.

למרות זאת, מדרשת פיינברג לא נפרדת מכם היום. המדרשה ומכון ויצמן ימשיכו ללוות אתכם-three מובנים: במישור המקצועי, הסטנדרטים והאיכויות אותם רכשתם בתקופת לימודיכם כאן ימשיכו לשמש לכם כאמת המידה הבסיסית, которую вы можете еще לשפר. חשוב לא פחות, ברמה הערכית, המדרשה תמשיך להיות לצידכם כקו מנחה באשר ל правила אתיים, הקפדה חסרת פשרות על אמת בדווח, וניתוק מוחלט בין אינטרסים אישיים ומקצועיים. המישור השלישי הוא המימד האנושי: דמויותיהם של מנחי המחקר שלכם, כמו גם דמויותיהם של עמיתיכם ללימודים, ילוו אתכם עשרות שנים. קטעי שיחות יחזרו מן הזיכרון שוב ושוב, דיונים בנושאים מדעיים ואישיים ישובו לחיים בנקודות התלבשות עתידה וישמשו לכם מקור השראה, כמו גם זיכרון נעים של תקופת יצירה, אחווה ונעורים.

תודת כולנו נתונה היום לידידים הנאמנים של מדרשת פיינברג של מכון ויצמן למדע, הפועלים ב_sharedא_تعاون עם המדרשה ועם המכון למען הכשרת מדענים המחר. לתמיכתם נודע תפקיד מרכזי בהתפתחות המדרשה.

היום אתם עומדים להצטרף כחברים חדשים למועדון היוקרתי של בוגרי מכון ויצמן למדע. כאלו, מהווים אתם משאב אנושי שערכו לא ישוער. הקריירה שלכם עשויה לפרוח באקדמיה, עם הקמת מעבדה משלכם, גילוי תגליות חשובות, והנחיית דור מדענים העתיד. את הידע שרכשתם תוכלו להביא לידי ביטוי במחקר ובפיתוח בתעשייה ובתחומים נוספים, ולתרום משמכם לחידושים ולהמצאות. תוכלו לנצל כישורים עסקייםولدיהם להקמת חברות הזנק שלכם, או אף לחקור אופקים אחרים מחוץ לעולם המדע.

אלו מכם שיעבדו או ילמדו בישראל יתרמו לפיתוח כלכלת מדענים של המדינה. מי מכם שבחרו לנסוע למקומות אחרים, באופן זמני או קבוע, ימשמו שגרירי רצון טוב בחוץ לארץ ויסיפו את כישוריהם למאגר ההולך וגדלו של חוקרים מובילים.

באשר תוביל אתכם דרככם, בכל מדינה בהו צורף שורש, תקוותי היא כי הידע והנסיון שרכשתם בבית ויצמן יאפשרו לכם לתרום תרומה ניכרת לאנושות. העולם זקוק לאנשים כמותכם, לאנרגיה שלכם, להתלהבותכם ולأفكارיכם היצירתיים.

עם סיום שנות לימודיכם בבית ויצמן, אני מקווה כי תישארו עימנו בקשר כבוגרים פעילים, ומקווה לראותכם בקמפוס לעתים קרובות.

The Einstein Institute is one of the leading institutes for basic science research in the world, in the fields of natural sciences and precise sciences: mathematics and computer sciences, physics, chemistry, biochemistry, and other focused research areas. It houses over 1,200 scientists and technologists in various departments, working on cutting-edge research that is advancing the frontiers of science. They are developing technologies, new materials, medicines, and advanced treatment methods.

About 850 professors and research managers work alongside 250 scientists with PhDs, engineers, and technicians, with an investment of over $1 million annually. Approximately a third of this is funded by government officers, while the rest is funded through competitive research grants, as well as donations and bequests.

The Institute’s academic arm, the Einstein Institute of Technology, was established in 1958 with financial support from the US government. It is known as the first higher education institution in the country, as well as a university in the USA, and is therefore required to teach in English. The faculty and tutors of the Institute are mostly from the scientific faculty of the Institute. The Institute's enrollment is currently close to 1,000 students, and the ratio of students to faculty is more than 1,000 to 1. The entrance is based solely on academic achievement, without discrimination based on religion, race, gender, or ethnicity. All students receive a maintenance grant to enable them to focus on their studies and research.

The language of instruction is English, which is a significant advantage for many international students. The Institute offers graduate programs only, in five main study directions: physics, chemistry, life sciences, mathematics, and computer science. In addition, there are interdisciplinary programs focused on the connections between various scientific fields.

The Dean is assisted by a board of directors, consisting of the heads of the various educational programs. The Deans Office is responsible for planning and organizing the programs, including the examination of student submissions and the evaluation of their achievements. The Institute also has the responsibility of managing the supervision of the postgraduate degrees programs at the Einstein Institute.
מדרשת פיינברג, היא זרוע האקדמית של מכון ויצמן למדע. המדרשה הוקמה ב-1958, על ידי ממשלת ארצות הברית, כדי להכשיר חוקרים במדעי הטבע. היא נקראת ע"ש אбраם פיינברג ז"ל, מייסד ויו"ר הראשון של חבר הנאמנים של המדרשה. המדרשה מוכרת כמוסד להשכלה גבוהה ע"י המועצה להשכלה גבוהה בישראל, וכן כמוסד האקדמי ע"י מדינת ניו-יورק בארה"ב, ולפיכך, מחויבת בהוראה בשפה האנגלית. מורים המדרשה שייכים ברובם לסגל המדעי של מכון ויצמן למדע. במדרשה לומדים י"ע, והיחס המספרי בין התלמידים לחברי הסגל הוא 1:3. הקבלה תבצעת על בסיס מצוינות אקדמית בלבד ללא הבדל דת, לאום, גזע ומין. כל תלמידי המדרשה מקבלים מלגת קיום כדי שיוכלו להקדיש את כל זמניםם ומרצם ללימודים ולמחקר.

המדרשה מציעה מסלולים לימודים לתארים מתקדמים בלבד, בחמש מגמות לימודים ראשיות: מדעי הפיסיקה, מדעי הכימיה, מדעי החיים, מתמטיקה ומדעי המחשב וכן הוראה המדע. לאור התפתחות המחקר רב-תחומית במכון ויצמן והעולה המתמדת בחשיבותו ובהשפעתו, קיימות גם תכניות לימודים רב-תחומיות המתמקדות בתחומים המשיקים בין מדעי החיים למדעי המתמטיים/פיסיקליים. בראש המדרשה עומד דיקן ולידו הוועדה המכוונת של המדרשה, המורכבת מיושבי-הראש של ועדות ההוראה במגמות השונות. לידם פועלת מזכירות המדרשה ובראשה מנהל המדרשה והמזכיר האקדמי שלה.

הלימודים בכל מסלול מתנהלים בפיקוחה של ועדת ההוראה. יו"ר ועדת ההוראה מרכז את כל פעולות הוועדה, כולל התווית תוכניות לימודים ודרישת הקבלה.

המדרשה גם אחריות ניהולית לתוכנית המשולבים בתכנית הדוקטורט במכון ויצמן למדע. הטיפול האקדמי בתוכנית הוא באחריות המועצה המדעית של המכון.
