

16:41:36 From Dennis Gaiatsgory : How to prove Zhu's statement?
16:43:15 From Jiuzu Hong : does it follow from zhu's adance paper?
16:43:35 From Dennis Gaiatsgory : Which paper?
16:44:12 From Jiuzu Hong : affine demazure module paper, but that paper only deal with type A,D for affine schubert varieties
16:44:31 From Raeetz Lorgat : <https://arxiv.org/pdf/0710.5247.pdf>
16:44:41 From Dennis Gaiatsgory : thanks!
16:50:10 From Raeetz Lorgat : Do we know a factorable vector bundle description of equivariant ell cohomology over the whole gauge-group aff. Grassmannian?
16:50:15 From Raeetz Lorgat : factorizable*
17:03:29 From Yue Feng : Is it natural to think about an arithmetic analog, like take Beilinson-Drinfeld Grassmannian as Witt vector affine Grassmannian?
