

**A hands-on look at Teaching for Robust Understanding:
Videos and tools for learning Communities**

Alan Schoenfeld

This workshop provides an opportunity to dig more deeply into the issues raised in Alan Schoenfeld's talk for the Jubilee Celebration Conference. We will look at videos to see how the Teaching for Robust Understanding (TRU) framework illuminates classroom issues, discuss TRU-related tools and professional development for teachers, and explore some of the research challenges we encounter when trying to documenting the impact of your work (e.g., just how do you document changes in teacher understanding of student thinking?)
