Set Up Cisco Jabber for Android

Before you Begin

Download the Cisco Jabber application from Google Play and install it.

Procedure

1. Connect your device to the network.

2. Open Cisco Jabber and follow the prompts to advance through the screens.

Note For Android OS 6.0 or later, you are prompted to permit Jabber to make calls, access your contacts, record your audio, and use your device battery. In this case accept all the permission requests.

3. If you are prompted to enter your username and domain, enter it in the following format: *username@weizmann.ac.il*, and tap Continue.

4. Enter your password, and tap Sign In.
You may be prompted to validate your server certificates. If you are unsure about this, contact your administrator to verify if you have to accept the certificates.

Use Cisco Jabber for Android on Your Phone

1. View or edit your availability status.
2. Access your features.
3. View or edit your settings.
4. View account information or sign out of your account.
