

Set up Cisco Jabber

Navigate to the Apple App Store and install the Cisco Jabber application.

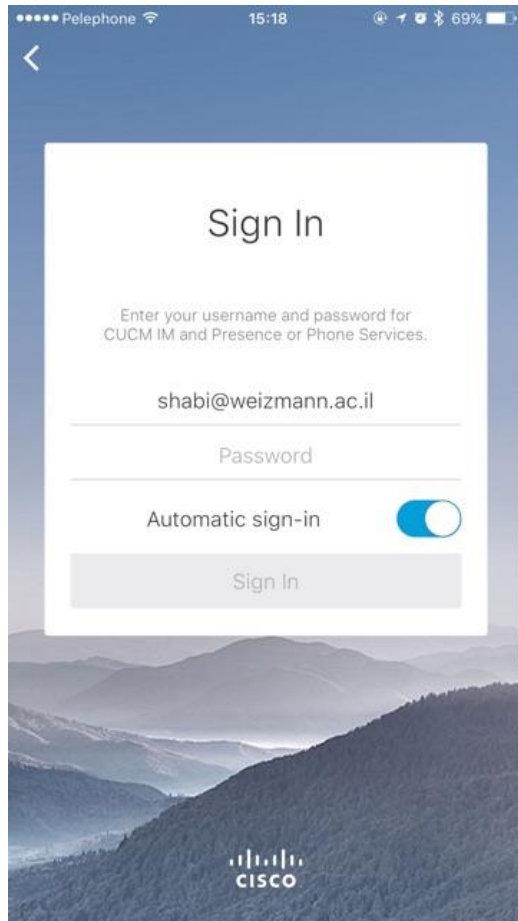

Make sure that you have your sign-in method and account information from your system administrator.

1. Stop other Voice-over-IP (VoIP) applications.
2. Connect to 3G or any Wifi Connection.
3. Open Cisco Jabber and follow the prompts to advance through the screens.

4. When you are prompted to enter your username and domain, enter it in the following format: [username@weizmann.ac.il](#). -> Continue

5. On the Sign-in page when you prompted to enter Password , enter in the Weizmann Domain Password.

5. On the final screen, tap Sign In.

You may be prompted to validate your server certificates. If you are unsure about this, contact your system administrator to verify that you should accept the certificate. After setup, learn more by viewing the user guides in the Cisco Jabber Settings menu.

What You Can Do on the Hub Window

1. Search for contacts or make a call.
2. Start group chat with a group.
3. Access your contacts.
4. View conversations and start chat.
6. View recent calls and make calls.
