Connect to your Weizmann office/lab computer using Remote Desktop Connection (RDP) from Windows:

How to

1. Click the **Start** button, and search for **Remote Desktop Connection**.

2. Click the **Remote Desktop Connection** application.

3. The Remote Desktop Connection window will open.
4. Click on **Show Options**.

5. In **Computer** field, enter the **IP address** of your Weizmann computer.
6. **In User Name**, enter the user name on the Weizmann computer.

**Please note:**
If your Weizmann computer is joined to the domain (its full computer name is PC********.wismain.weizmann.ac.il), the username must be written in the syntax of “wismain\YourUserID”.

7. Click **Connect**.

8. In the credentials window, enter the password, and then click **OK**.

![Windows Security]

**Enter your credentials**

These credentials will be used to connect to 132.77.119.237.

9. In the computer identity verification window, click **Yes**.

![Remote Desktop Connection]

**The identity of the remote computer cannot be verified. Do you want to connect anyway?**

The remote computer could not be authenticated due to problems with its security certificate. It may be unsafe to proceed.

- Certificate name

  - Name in the certificate from the remote computer:
  - PC04668570.wismain.weizmann.ac.il

- Certificate errors
  - The following errors were encountered while validating the remote computer’s certificate:
    - The certificate is not from a trusted certifying authority.

Do you want to connect despite these certificate errors?

- [ ] Don’t ask me again for connections to this computer

[View certificate...] [Yes] [No]
