

Installing and Connecting to Eduroam on Windows 10

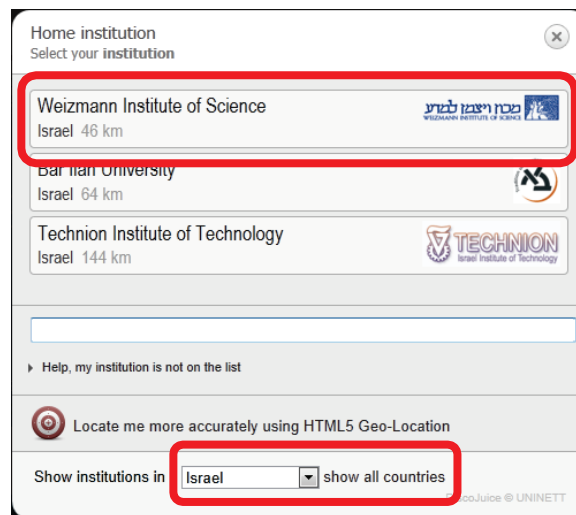

The following one-time installation (to be carried out by Weizmann Institute personnel only) will enable you to connect to Eduroam automatically, whenever the service is in range.

To set up automated connection to Eduroam:

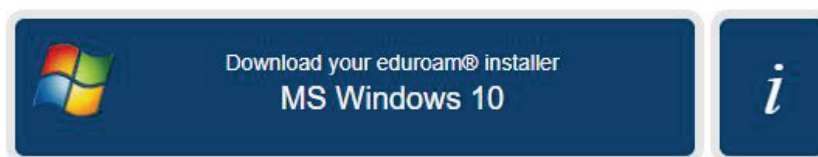

1. [Access cat.eduroam.org](http://cat.eduroam.org) via your browser.
2. Click on **Click here to download your eduroam installer**.

3. Click **Weizmann Institute of Science** in the window that pops up. When connecting from overseas, select to show institutions in **Israel**.

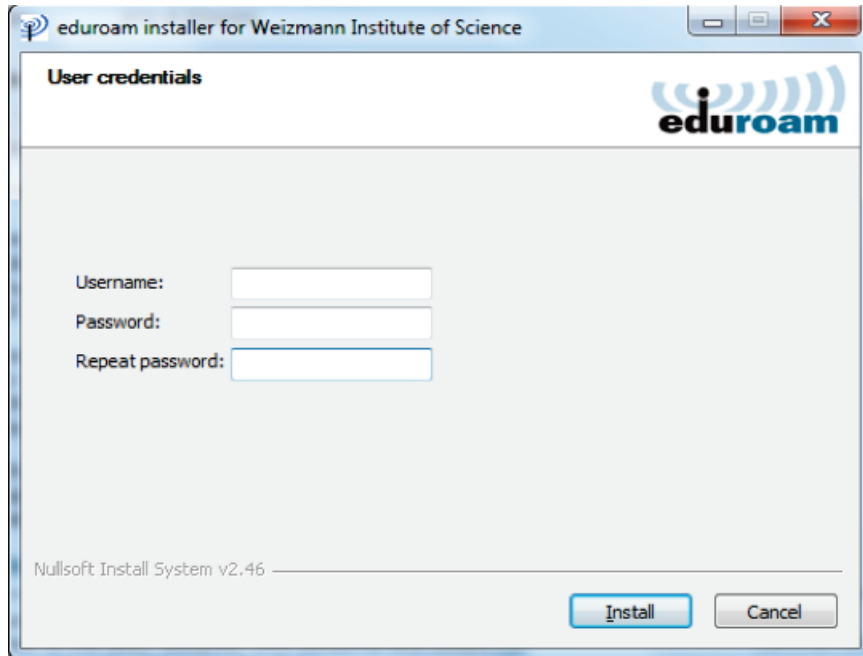

4. Click on **Download your eduroam® installer/MS Windows 10** and run the file **eduroam-W10-WIoS.exe** that will be downloaded. If prompted by your anti-virus program, approve installation execution.

5. Click **Next** when presented with the Eduroam installer's welcome dialog.

6. When asked for credentials, enter your Weizmann user ID in the format **username@wismain.weizmann.ac.il**, enter and reenter your password, then click **Install**.

When installation is complete, you'll automatically be connected to Eduroam.
