Mac@WIS – Password Sync with Jamf Connect for users
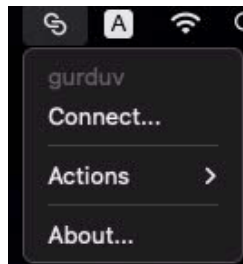

Jamf Connect:

Jamf Connect created a local user with network credentials, and added a system add on, that keeps the passwords synchronized.
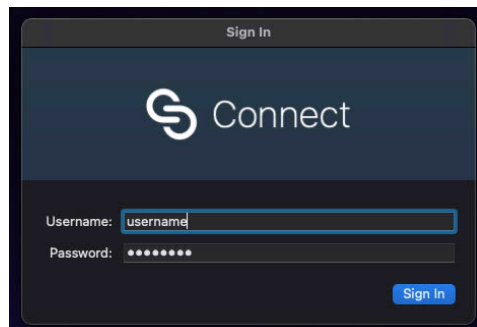

Process:

How do I update my password with Jamf Connect?

1. Change your password via https://preset.weizmann.ac.il or https://password.weizmannac.il as per the usual procedure.
2. If you are logged in to your Mac, Jamf Connect should prompt you within 15 minutes to re-sign in.
3. Click the Jamf Connect Menu Bar icon, and choose "Connect"

4. Enter you Weizmann username and new password.

5. Once you sign in with your **new password** it will ask you to sign in with your **old password** to sync keychains.
6. Once this is done all passwords should be synced and your keychain should be updated and the process is complete

Note: You may still have to update your password for applications such as Micorosoft Outlook

What if I forgot my old password after changing it?

The recommended resolution is to contact the Support Center and request for help resetting your forgotten password.
