

## Remote Connection via F5 Client VPN on Linux:

### How to

1. Open [evpn.weizmann.ac.il](https://evpn.weizmann.ac.il).
2. Login using your Weizmann credentials
3. Select RSA or SMS as OTP method
4. Click on **More Options**
5. Click on Install **Network Access Application**
6. Follow the instructions in the pop-up window to download and install the package for your Linux distro (DEB or RPM)

#### Debian & Ubuntu:

```
sudo dpkg -i install linux_f5vpn.x86_64.deb
```

#### CentOS & Fedora:

```
sudo rpm -ivh linux_f5vpn.x86_64.rpm
```

7. Run the F5 Network VPN app
8. Select “**Always Allow..**” in the security warning pop-up window
