

A Weizmann Workshop on

Frontiers of Multiple Myeloma 2015

From Basic Concepts to Clinical Practice

Thursday, May 28, 2015

David Lopatie Conference Centre
Weizmann Institute of Science

In this workshop, scientists and physicians who share basic and translational interests in multiple myeloma, will address four central aspects of the disease:

- Clonal heterogeneity in myeloma
- Primary drug resistance in myeloma
- New approaches in myeloma immunotherapy
- Myeloma involving the extra-medullary compartment

The goal: To lay the groundwork for research partnerships aimed at developing novel therapeutic approaches to myeloma, and introducing them into the clinic.
