The Weizmann Institute of Science is one of the world’s leading institutions of basic scientific research in all disciplines of natural and exact sciences: mathematics and computer sciences; physics; chemistry; biochemistry and biology. At any given time, some 1,200 studies are being conducted at the Weizmann Institute in fields that are on the cutting edge of science and that serve to enrich human knowledge about the world around us and our role in the universe. The Institute’s unique character encourages numerous multidisciplinary collaborations in all areas of research. The scientific investigations conducted at the Weizmann Institute makes a major contribution to the development of new technologies and to the invention of new materials, medicines, and state-of-the-art medical treatment, and to better understanding the environment and developing alternative sources of energy. The Institute invests considerable efforts and resources in scientific education for school-aged children and the public.

Some 2,700 employees work at the Weizmann Institute of which some 250 are professors and other scientists heading their own research teams. Some 950 are staff scientists, engineers, and technicians; more than 1,100 are graduate students (master’s and doctoral candidates) and some 400 are administrative employees. The Institute’s budget is approximately one billion shekels – a quarter of which is granted by the Israel government with the remainder originating from grants won by the Institute’s scientists as well as from donations and scholarships.
The Feinberg Graduate School is the educational arm of the Weizmann Institute of Science. It was founded in 1958 with the support of the United States Government. The Graduate School is named for Abraham Feinberg, LL.B. (U.S.A.) founder and first Chair of its Board of Trustees. The main goal of the Feinberg Graduate School is the advanced training of new generations of creative and original researchers in the natural sciences and mathematics, or, in other words, the education of future scientific leaders.

The Graduate School offers programs leading to the degrees of Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.) in Physics, Chemistry, Life Sciences, Mathematics and Computer Science, and Science Teaching. Interdisciplinary programs are widespread and encouraged.

Since its founding, the Graduate School has been an accredited institution of higher learning in Israel, and received an absolute charter granted by the Board of Regents of the State of New York. The instructors and advisors of the Graduate School are members of the scientific staff of the Weizmann Institute of Science. Currently, there are over 1,100 students, with a student-teacher ratio of 4:1, enabling considerable individual attention. The official language of instruction is English. This enables foreign students to participate fully in all of the Graduate School’s programs. The only criteria for acceptance to the School are academic excellence and scientific integrity. Admission to all programs, privileges, and activities is granted without regard to race, gender, color, nationality, and origin. All students are directly involved in the research conducted at the Institute, and receive scholarships that allow them to devote all their energies to research and study. There are no tuition fees.

The Graduate School consists of five Research Schools: the Solo Dwek and Maurizio Dwek Research School of Chemical Science, the Ekard Research School of Biological Science, the Lorry I. Lokey Research School of Biochemical Science, the Moross Research School of Mathematics and Computer Science and the André Deloro Research School of Physical Science. This year, the André Deloro School of Physical Science was named thanks to a generous donation from the Mr. André Deloro of France who passed away recently.

These schools provide an extra boost to the students’ immersion into scientific research, supporting them in their becoming mature scientists. The Research Schools’ benefits for students include a wide range of opportunities for personal development, such as scientific travel grants to facilitate expanded contacts with the international research community, greater exposure to world leaders in their fields through student-organized lectures, workshops, and conferences, and support for services and information resources.

The Feinberg Graduate School is headed by a Dean, assisted by a steering committee consisting of the Directors of the Research Schools. Each Research School has a Board of Studies that coordinates all activities in the relevant discipline. The Graduate School Office, headed by a Director and Academic Secretary, coordinates general administrative operations of the School.

The Feinberg Graduate School also coordinates the Kupcinet-Getz Summer School Program for undergraduate students from Israel and abroad.
Dear Graduates,

It gives me great pleasure to congratulate you, the Weizmann Institute's new graduates, as well as your families, your faculty advisors, and your mentors, on your tremendous achievement in receiving an advanced degree. I truly hope that the work you have accomplished here has been fulfilling and will propel your careers in the direction in which you choose to take them.

I know how much you have added to the Weizmann Institute of Science community in your time here. Because you are part and parcel of the research in our laboratories, you have not only been soaking up knowledge from experienced faculty, but have also contributed to the advancement of science. Your injection of fresh and creative ideas into our investigations is part of our recipe for success. It's a symbiotic relationship in which the best kind of scholarship occurs.

You have received a world-class science education. You now have the chance to play meaningful roles in science. Here in Israel, you can become an actor in this country's unbelievable narrative of ascendency in R&D—at the bench or in industry. The Weizmann Institute, of course, is part of this narrative. Overseas, there is a thirst for all the knowledge you have accumulated and, moreover, for the special Israeli brand of entrepreneurship that you have been exposed to among your colleagues in the lab. That is: Take your innovative idea and run with it.

On your behalf, I’d also like to extend thanks to the Feinberg Graduate School’s community of alumni and faithful supporters throughout the world, whose friendship for the School has been so important in its development. Because of our supporters, we were able to establish in recent years five research schools to complement our five faculties.

This year, through the generous donation of the Adelis Foundation, we have named the fifth research school, the André Deloro Research School of Physical Science.

In other news, we have just selected the first four recipients of the David Lopatie Fellowship, which offers scholarships to outstanding Master’s students. These four individuals are incredibly talented budding scientists who received the highest recommendations possible, not only top-notch grades. The fellowships were established thanks to the generosity of Board member David Lopatie of Johannesburg, as part of his visionary contribution last year for the David Lopatie Hall of Graduate Studies. The Fellowships help the Institute advance its efforts to recruit the best and brightest students from Israel and abroad, and enrich their educational experience.

As recent graduates, we hope you will take the time to join our Alumni Organization via the website www.weizmann.ac.il/alumni/English/home and benefit from and contribute to the knowledge and experience of its many illustrious alumni.

Indeed, we take pride in all your achievements here. We wish you great success as you embark on your careers, which we expect will be grounded in the ultimate goal of advancing science for the benefit of humanity.

We hope that this place has inspired you and hope you remain connected to the Weizmann family as alumni. We’d love to continue to see you on campus in the years ahead.

With best wishes,

Prof. Daniel Zajfman, President
Weizmann Institute of Science
Dear Graduates,

This is the time for our annual graduation ceremony, when we celebrate together your officially joining the world community of scientists. I hope that during the years we spent together we provided you with the tools to develop from what is often a nebulous, not-yet-informed scientific personality into a full-blown scientist. These tools are intellectual, knowledge-oriented on the one side, and practice-oriented on the other. There is, however, also an additional aspect, which is not less important or real because it is impalpable: This has to do with perceiving the freedom associated with the lack of boundaries of the intellectual universe, the exhilaration of jumping a mental boundary, the challenge of understanding, and the sense of doing it right.

The word science comes, in all languages that I know, from the root of the word knowledge: We seek knowledge about the universe around us, as many have done before us. We are all aware of the groundbreaking scientific contributions made thousands of years ago in Egypt, in Greece, in China, in Iraq and in ancient Persia in the areas of astronomy, mathematics, physics and medicine. We all profit from what these ancient fathers contributed to humankind.

Consideration of these examples should encourage us more than anything else to realize that science has no boundaries of geography, language, race or belief.

I invite you to exploit at its best this unique power of science: the freedom of scientific thinking makes us 'citizens of the world'. Science does not belong to one country or to one people, it is universal and cosmopolitan; as such it must be used to increase our collective knowledge and understanding, building bridges between like minds motivated by the curiosity to understand the universe surrounding us.

We are scientists, and as such we took our vows to scholarship, rigor and total honesty. What should we then do with our science? Curiosity-driven research or applied research? Should we do science for its 'fruit-bearing' or science for its 'light-bearing' qualities? As bizarre as this may sound when speaking about science, there are no precise answers to these questions, and neither is there a precise procedure to be followed in order to seek the answer. Creativity, originality and intuition are important in the research scientist not less than what they are in the humanities. Science is also an art, and each one of you as an artist must find his or her own way of expressing oneself. Only when and if you find your individual answer, and you pursue it without compromises, will you be able to exploit your potential at its maximum. Whichever is the answer you find, I wish you great success in the continuation of your careers.

Thank you for what you have given to us, which is not less quantitatively and qualitatively, and certainly not less important than what we have given to you.

Good luck to you in the rest of your life to come.

Prof. Lia Addadi, Dean
Feinberg Graduate School
Dear Graduates,

I am privileged and honored to congratulate you on your graduation and receipt of degrees. Of all the ceremonies in which my role requires me to take part, this one continues to move me and give me pride, pleasure, and satisfaction. So the fact that this is presumably the final degree to be conferred on you is saddening. The advantage, on the other hand, is that I can take the liberty to reuse my words said at the previous two ceremonies.

The completion of your studies represents an important crossroads in your professional life. It is an appropriate time to take stock, do some soul-searching, and prepare for important decisions. This fact, I am sure, is clear to you.

What I am not sure you are aware of is that this is also an important point for those of us who have guided you over the last few years. For us, your teachers, this is a moment of self-examination and introspection. After all, you have entrusted us with some of your most creative and productive years. We ask ourselves: Have we lived up to the challenge? Will the education and training that we provided prepare you well for your careers?

Perhaps you do not realize how difficult it is for an advisor to decide on the “right” path. Many frustrations await those who scour the books looking for enlightenment. Oscar Wilde’s advice—for example, “Education is an admirable thing, but it is well to remember from time to time that nothing that is worth knowing can be taught”—is, although witty, both erroneous and not at all helpful. Anatole France’s saying, “Nine-tenths of education is encouragement,” is qualitatively—but not quantitatively—correct, and does not hint at what should be provided beyond encouragement. Albert Einstein, who was also interested in education, is the one who gave the clearest solution to this issue, saying “The only rational way of educating is to be an example—if one can’t help it, a warning example.” That is, if I cannot exemplify good conduct, I should at least provide a good example of the things that must not be done!

Indeed, many of us are surprised to discover that certain aspects of our own approach to educating our students are exact replicas of the education we received, while in other aspects, we try to do the opposite of what our advisors did.

This extended influence reflects the great responsibility that lies on our shoulders. As the Talmud says, “The father who teaches his son, it is as if he had taught his son, his son’s son, and so on to the end of generations.” (Tractate Kiddushin 36)

I hope that your teachers’ personal example taught you never to stop asking, wondering, and thinking. I hope you have learned that choosing the right question is the key question—and the most difficult challenge—facing a scientist. I hope the importance and centrality of personal and intellectual integrity, striving continuously for excellence, realizing your capabilities and potential to the fullest, working hard, and making uncompromising efforts is clear to you.

One must admit that it is not only the political reality that is challenging—I am certain that you have been exposed to the less-than-pleasant aspects of the world of modern science, such as the pressure to publish, the politics behind the acceptance or rejection of articles, and the strong competition that leads some people into dishonesty and unfairness. I hope you will not surrender to cynicism, and that you will succeed in maintaining your curiosity, enthusiasm, vitality, and integrity. I sincerely hope that as you part from the Weizmann Institute, you recognize the privilege you have been granted—to ask the most interesting and challenging questions, seek their answers and make a living doing it.

Prof. Eytan Domany
Chairman of the Scientific Council
Dear Alumni,

On behalf of the Weizmann Institute Alumni Organization, I would like, first and foremost, to congratulate all those who have joined the family of Weizmann Institute of Science graduates this year and to wish you the best of luck for the future.

The goals the Alumni Organization has set for the coming years are keeping in touch with all Weizmann Institute alumni, creating a social and professional alumni network, and strengthening the Weizmann Institute's ties with Israel's economic, industrial, and financial sectors.

I would like to take this opportunity to cordially invite you to visit our Alumni Organization website and to register as an alumnus. During the registration process you will be presented with the option of opening your own alumni e-mail address. Once you register, we will be able to keep in touch with you and send you Weizmann Institute updates and news.

Our English website address is www.weizmann.ac.il/alumni/English. We can also be found on Facebook and LinkedIn.

I wish you all the best in your future endeavors and encourage you to keep in contact with us.

Yael Goren-Wegman
Executive Director
Israeli Friends and Alumni Organization
The John F. Kennedy Prize

The research prizes in memory of John F. Kennedy are awarded by the memorial fund for the late U.S. President. The Kennedy Fund awards grants to research students, travel grants, postdoctoral fellowships, and grants to senior visiting scientists at the Institute.

With gratitude to the supporters of the graduate studies program at the Weizmann Institute of Science

The Weizmann Institute of Science and the students and staff of the Feinberg Graduate School are grateful to our many friends throughout the world who have generously funded our graduate studies program.

The Weizmann Institute has created five new research schools affiliated with its five faculties to expand and enhance its graduate education. All of the research schools have been endowed: The Lorry I. Lokey Research School of Biochemical Science, established in 2007; the Solo Dwek and Maurizio Dwek Research School of Chemical Science, established in 2008; the Moross Research School for Mathematics and Computer Science, established in 2009; the Ekard School of Biological Sciences, established in 2009, and the André Deloro Research School of Physical Science, established in 2013.

These strategic investments provide students with greater opportunities for personal development and independent research, expanded contacts with the international research community, and even greater exposure to world leaders in their fields.

Scholarships are precious gifts—in essence, gifts of knowledge. They enable our students to concentrate on their studies, freeing them to devote their full energies to coursework and laboratory research. This steadfast encouragement has borne fruit in the many research scientists all over the world who began their careers at the Weizmann Institute of Science. Today’s graduates are tomorrow’s scientific leaders.
