Feinberg Graduate School

2017 Graduates

Weizmann Institute of Science
The Weizmann Institute of Science is one of the world’s leading institutions of basic scientific research in all disciplines of natural and exact sciences: mathematics and computer sciences, physics, chemistry, biochemistry and biology. Its scientists conduct studies in fields that are on the cutting edge of science and that serve to enrich human knowledge about the world around us and our role in the universe. The Institute’s unique character encourages numerous multidisciplinary collaborations in all areas of research. Weizmann Institute investigations greatly further the development of new technologies and alternative sources of energy and the invention of new materials, medicines, and state-of-the-art medical treatment. The Institute invests considerable efforts and resources in scientific education for school-age children and the public.

The Institute consists of some 3,000 scientists, students, and supporting staff. The Institute’s budget is approximately one billion shekels – a quarter of which is granted by the Israel government with the remainder originating from grants won by the Institute’s scientists as well as from donations and scholarships.
The Feinberg Graduate School is the educational arm of the Weizmann Institute of Science. It was founded in 1958 with the support of the United States Government. The Graduate School is named for Abraham Feinberg LLB (USA) founder and first Chair of its Board of Trustees. The main goal of the Feinberg Graduate School is the advanced training of new generations of creative and original researchers in the natural sciences and mathematics, or, in other words, the education of future scientific leaders.

The Graduate School offers programs leading to the degrees of Master of Science (MSc) and Doctor of Philosophy (PhD) in Physics, Chemistry, Life Sciences, Mathematics and Computer Science, and Science Teaching. Interdisciplinary programs are widespread and encouraged.

Since its founding, the Graduate School has been an accredited institution of higher learning in Israel. It later received an absolute charter granted by the Board of Regents of the State of New York. The instructors and advisors of the Graduate School are members of the scientific staff of the Weizmann Institute of Science. Currently, there are more than 1,100 students, with a student-teacher ratio of 4:1, enabling considerable individual attention. The official language of instruction is English. This enables foreign students to participate fully in all of the Graduate School’s programs. The only criteria for acceptance to the School are academic excellence and scientific integrity. Admission to all programs, privileges, and activities is granted without regard to race, gender, color, nationality, and origin. All students are directly involved in the research conducted at the Institute, and receive scholarships that allow them to devote all their energies to research and study. There are no tuition fees.

The Graduate School consists of five Research Schools: the Solo Dwek and Maurizio Dwek Research School of Chemical Science, the Ekard Research School of Biological Science, the Lorry I. Lokey Research School of Biochemical Science, the Moross Research School of Mathematics and Computer Science and the André Deloro Research School of Physical Science.

These schools provide an extra boost to the students’ immersion into scientific research, supporting them in their becoming mature scientists. The Research Schools’ benefits for students include a wide range of opportunities for personal development, such as scientific travel grants to facilitate expanded contacts with the international research community, and greater exposure to world leaders in their fields. Each Research School has a Board of Studies that coordinates all activities in the relevant discipline.

The Feinberg Graduate School is responsible for the administrative and academic aspects of the postdoctoral training at the Weizmann Institute of Science. The School also coordinates the Kupcinet-Getz International Summer Science School for outstanding international undergraduate students.

The Feinberg Graduate School is headed by a Dean, assisted by the Academic Secretary of the School and by a steering committee consisting of the Directors of the Research Schools. The Graduate School Office coordinates all the general administrative operations of the School.
Dear Graduates,

It was just a few years ago that every one of today’s Feinberg School’s degree recipients arrived here on campus. Whether you came to the Weizmann Institute to earn a master’s or a PhD, and whether your goal was to advance in mathematics, computer science, physics, biochemistry or science teaching, you were full of excitement, and alive with expectation. Now, looking on with pride as you take your first steps down the path that will lead to your future endeavors, I would like to take a moment to reflect on the past, and also, to describe what will be expected of you in the future.

As graduates of the Feinberg School, you are privileged. You go out into the world with a finely-tuned ability to think critically. Critical thinking is more than just an ability to distinguish between various approaches. It is more than an ability to choose among alternative data sets that relate to your chosen field. Instead, critical thinking provides you with a powerful and universal tool for reaching beyond your current expertise, in order to make a positive impact on the wider world.

As 21st century scientists, new technologies are drowning us in data. As citizens of 21st century society, new media is overwhelming us with messages—the words, pictures, and videos that draw our attention at every juncture, creating a constant struggle as we try to balance our virtual existence with the needs of ourselves and those around us. Here, too, critical thinking plays a role, enabling an educated individual to identify what’s important, to pay attention to what’s right, and to act on it. As graduates of the Feinberg School, this high standard of leadership will be expected of you, wherever you go.

A little more than a century ago, Henri Poincaré, a French mathematician, theoretical physicist, engineer, and philosopher of science, said the following: “Science is built up of facts, as a house is built of stones; but an accumulation of facts is no more a science than a heap of stones is a house.” The ability to think critically—to put stone upon stone, and idea upon idea—is what will lead to progress in your professional future, and in your personal development.

As you move on to your next adventure in academia, in industry, or wherever your heart and your training may take you, I would like to wish you much success. Just as your earlier academic accomplishments brought you here, to study at the Feinberg Graduate School, we expect that the training you have received here on campus will serve you well, as you go forth and find your own way to advance science, and to serve humanity.

Prof. Daniel Zajfman, President
Weizmann Institute of Science
Dear Graduates,

It is my fourth year attending this distinguished ceremony as the dean of the Feinberg Graduate School, and I am as full of pride as ever. The graduation ceremony gives us—scientists and administrative staff—the opportunity to show our appreciation and to honor our students who are standing here today after they have completed a long, tough, and exciting journey.

We are proud of you, the fresh graduates of the Weizmann Institute of Science—those of you who have just received your PhDs and are about to start a new life as independent scientists, and those of you who have received your MSc degrees and will continue with your scientific training. You all deserve praise for your impressive achievements.

Jacques Cousteau, the French ecologist and marine scientist, once said: “What is a scientist, after all? It is a curious man looking through a keyhole, the keyhole of nature, trying to know what’s going on.” Indeed, there are two qualities that all of us scientists share: a restless and determined curiosity to investigate the wonders of the universe, and a limitless optimism, believing in our ability to attain a deep understanding of this world.

Defining the research question and the working hypothesis is one of the important stages in scientific research. Dear graduates, the projects you have led with your PIs taught you mainly how to think in a creative and challenging way, how to ask questions, how to define working hypotheses in fresh and accurate ways, and then how to plan the path ahead toward finding answers to your questions.

I am sure that our fruitful years together at the Weizmann Institute of Science have provided you with “positive scientific chutzpah”, that is, the ability to think outside the box. This kind of “chutzpah”, interwoven with rich knowledge and personal abilities, may lead you toward revolutionary science.

I want to thank each and every one of your families for nurturing and encouraging you to strive for excellence and for advocating for you throughout the years. Dear families, you have supported them financially and emotionally throughout the challenging path of academic studies. I also thank the teachers, my colleagues, for the hours they spent teaching, instructing, and training our graduates—promising scientists in mathematics, computer science, physics, chemistry, life sciences, and science education.

Quoting the humble words of the well-known British scientist, Sir Isaac Newton, to his colleague Robert Hooke, one of the greatest experimental scientists of the 17th century and a key figure during the scientific revolution: “If I have seen further, it is by standing on the shoulders of giants”.

Personally, I must add that my own teacher, Nobel Prize winner Prof. Ada Yonath, taught me that a good scientist should be equipped with creativity, diligence, and modesty. I wish for you to find the way to stand on your teachers’ shoulders and to express your creativity with diligence and modesty.

Prof. Irit Sagi
Dean, Feinberg Graduate School
Dear Graduates,

I would like to start by quoting André Gide, winner of the Nobel Prize: “Man cannot discover new oceans unless he has the courage to lose sight of the shore”. This courage to move away from the familiar is the essence of scientific activity. It is an exciting evening for all of us: graduates, families, and the Weizmann Institute’s scientists. We are fortunate to be able to educate and teach, and also learn from the new generation of scientists that are starting a new and challenging journey today.

We train scientists to lead research in universities and institutions, and in industry worldwide, and to act within the international community that is distinguished by the fact it has no geographic or political borders.

Being a scientist is more than a profession; it is a way of life, a way of expressing curiosity, and of trying to understand and to think outside the box. It is a path that includes daily encounters with new and varied challenges, and in addition to talent and professionalism, the ability to cope with criticism and frustration. Quoting Thomas Edison: “Genius is one percent inspiration and 99 percent perspiration”.

It is an empowering experience to go through the process of defining a research question, conceptualizing it, and acquiring the proof, and overcoming all the obstacles on the way. Being a scientist means having the privilege to broaden the borders of knowledge and expand one’s personal and professional skills. The main challenge we are giving you is to combine a strict work method with independent thought.

One of the privileges of serving as a supervisor to master’s and PhD students is the fact that one’s students are always young. But the downside is that after working hard together and getting used to one another, we must say goodbye.

So I thank you, dear graduates, and wish you the best of luck. Thank you to the academic staff and to the families of the students for your support during this challenging journey.

Prof. Zvulun Elazar
Chair of the Scientific Council
Dear Graduates,

On behalf of the Weizmann Institute Alumni Organization, I would like first and foremost to congratulate all those who have joined the family of Weizmann Institute graduates this year and to wish you the best of luck for the future.

Many Weizmann Institute alumni hold senior posts and influential positions in Israel and abroad – a true source of pride for the Institute. A quarter of science PhD graduates in Israel are Weizmann alumni, and they greatly contribute to the country’s economic, scientific, and technological development.

The goals the Alumni Organization has set for the coming years are keeping in touch with Weizmann Institute alumni, creating a social and professional alumni network, and strengthening the Institute’s ties with Israel’s industrial and financial sectors.

I would like to take this opportunity to cordially invite you to visit our Alumni Organization website at www.weizmann.ac.il/alumni/ in order to register and update your contact details. During the registration process, you will be presented with the option of opening your personal alumnus e-mail address. Once you register, we will be able to keep in touch with you and send you Weizmann updates and news. We can also be found on Facebook and LinkedIn.

We welcome your ideas and initiatives for further strengthening the Alumni Organization as a meaningful and influential body.

I wish you all the best in your future endeavors and encourage you to keep in touch with us.

With gratitude to the supporters of the graduate studies program at the Weizmann Institute of Science

The Weizmann Institute of Science and the students and staff of the Feinberg Graduate School are grateful to our many friends throughout the world who have generously funded our graduate studies program.

The Weizmann Institute created five new Research Schools affiliated with its five Faculties to expand and enhance its graduate education. These strategic investments provide students with greater opportunities for personal development and independent research, expanded contacts with the international research community, and even greater exposure to world leaders in their fields.

The Lorry I. Lokey Research School of Biochemical Science was established by California entrepreneur and philanthropist Lorry Lokey in 2007. It provides students in biochemistry, at all levels, with the tools and opportunities needed to excel.

Two brothers, Maurizio from Geneva and Solo from Milan, and their families founded the Solo Dwek and Maurizio Dwek Research School of Chemical Science in 2008 to provide students in chemical sciences necessities such as laptops, software, journal subscriptions, and conference travel expenses.

Former Chair of the International Board of the Weizmann Institute, financial wizard Mandy Moross of London, established the Moross Research School for Mathematics and Computer Science in 2009. The Moross Research School sponsors special guest lectures, student-led workshops, and other enrichment for students of mathematics and computer sciences.

The Ekard School of Biological Sciences was also established in 2009 with an anonymous donation from a member of the International Board. The Ekard School provides funding to attract guest lecturers and visiting scientists in emerging areas of biology.

The André Deloro Research School of Physical Science was established in 2013 by the Adelis Foundation, founded by French entrepreneur and philanthropist André Deloro. The Deloro Research School works in tandem with the André Deloro Institute for Space and Optics Research to explore the nature of the universe from the smallest particle to the most distant galaxies.

The David Lopatie Fellows

Up to ten David Lopatie Fellows in the MSc and PhD tracks are selected each year by the Dean of the Feinberg Graduate School, based on exceptional academic performance. This prestigious award includes a first-year PhD scholarship and a personal travel allowance for scientific meetings, workshops, and schools.

These strategic investments provide students with greater opportunities for personal development and independent research, expanded contacts with the international research community, and even greater exposure to world leaders in their fields.

Scholarships are precious gifts—in essence, gifts of knowledge. They enable our students to concentrate on their studies, freeing them to devote their full energies to coursework and laboratory research. This steadfast encouragement has borne fruit in the many research scientists throughout the world who began their careers at the Weizmann Institute of Science. Today’s graduates are tomorrow’s scientific leaders.
