Feinberg Graduate School

2016 Graduates
The Weizmann Institute of Science is one of the world’s leading institutions of basic scientific research in all disciplines of natural and exact sciences: mathematics and computer sciences; physics; chemistry; biochemistry and biology. Its scientists conduct studies in fields that are on the cutting edge of science and that serve to enrich human knowledge about the world around us and our role in the universe. The Institute’s unique character encourages numerous multidisciplinary collaborations in all areas of research. Weizmann Institute investigations greatly further the development of new technologies and alternative sources of energy and the invention of new materials, medicines, and state-of-the-art medical treatment. The Institute invests considerable efforts and resources in scientific education for school-aged children and the public.

The Institute consists of some 3,000 scientists, students, and supporting staff. The Institute’s budget is approximately one billion shekels – a quarter of which is granted by the Israel government with the remainder originating from grants won by the Institute’s scientists as well as from donations and scholarships.
The Feinberg Graduate School is the educational arm of the Weizmann Institute of Science. It was founded in 1958 with the support of the United States Government. The Graduate School is named for Abraham Feinberg, LLB (USA) founder and first Chair of its Board of Trustees. The main goal of the Feinberg Graduate School is the advanced training of new generations of creative and original researchers in the natural sciences and mathematics, or, in other words, the education of future scientific leaders.

The Graduate School offers programs leading to the degrees of Master of Science (MSc) and Doctor of Philosophy (PhD) in Physics, Chemistry, Life Sciences, Mathematics and Computer Science, and Science Teaching. Interdisciplinary programs are widespread and encouraged.

Since its founding, the Graduate School has been an accredited institution of higher learning in Israel. It later received an absolute charter granted by the Board of Regents of the State of New York. The instructors and advisors of the Graduate School are members of the scientific staff of the Weizmann Institute of Science. Currently, there are over 1,100 students, with a student-teacher ratio of 4:1, enabling considerable individual attention. The official language of instruction is English. This enables foreign students to participate fully in all of the Graduate School's programs. The only criteria for acceptance to the School are academic excellence and scientific integrity. Admission to all programs, privileges, and activities is granted without regard to race, gender, color, nationality, and origin. All students are directly involved in the research conducted at the Institute, and receive scholarships that allow them to devote all their energies to research and study. There are no tuition fees.

The Graduate School consists of five Research Schools: the Solo Dwek and Maurizio Dwek Research School of Chemical Science, the Ekard Research School of Biological Science, the Lorry I. Lokey Research School of Biochemical Science, the Moross Research School of Mathematics and Computer Science and the André Deloro Research School of Physical Science.

These schools provide an extra boost to the students' immersion into scientific research, supporting them in their becoming mature scientists. The Research Schools' benefits for students include a wide range of opportunities for personal development, such as scientific travel grants to facilitate expanded contacts with the international research community,

and greater exposure to world leaders in their fields. Each Research School has a Board of Studies that coordinates all activities in the relevant discipline.

The Feinberg Graduate School is responsible for the administrative and academic aspects of the postdoctoral training at the Weizmann Institute of Science. The School also coordinates the Kupcinet-Getz International Summer Science School for outstanding international undergraduate students.

The Feinberg Graduate School is headed by a Dean, assisted by the Academic Secretary of the School and by a steering committee consisting of the Directors of the Research Schools. The Graduate School Office coordinates all the general administrative operations of the School.
Dear Graduates,

One of the things you would have realized weeks into your degrees is that despite hours of secluded work at the lab, white board, or computer screen, scientific research is seldom a solitary venture. For one person’s novel idea to unfold – paving the way to a groundbreaking concept, technology, or perhaps a drug – it takes the proverbial village. Progress entails refining the idea by bouncing it off colleagues and advisors; mutually learning from others; exposing your work, and indeed, your thinking, to critique; participating in conferences and lectures; and of course, presenting it for rigorous assessment and debate. Exchange of ideas and knowledge is the crux of the research process.

On the other hand, the present is a time of growing gaps among peoples and nations. Soaring political tensions worldwide, the refugee crisis in Europe, increasing violence in our region, and the spreading of yet another viral epidemic are forming barriers of fear between communities, societies, and countries. Ill-boding for democracy, hope, and peace, these barriers act as separators and isolators amidst the global village. In the current tumultuous period, the need for individuals to cross those barriers is exigent.

This can only be done through a common language and shared goal that outstrips geopolitical struggles; a language that we share – the language of science.

This may seem like a heavy burden to place on the shoulders of those who have only just graduated, taking early steps in their careers. And yet, science is inherently a connector of people. Be it by the collaborative nature of the process, the findings with potential to create a better world, or the shared desire to understand that ignites scientists’ drive to solve a problem – just by doing science, you are already involved in breaking down barriers.

As you follow your professional path, I hope you retain the sense of wonder that stirred you to science and brought you to the gates of the Weizmann Institute of Science in the first place. I hope that throughout your career, you will continue to interact and cooperate with colleagues from near and far, and enjoy the fruits of such exchange. During your studies here, you have all made a considerable contribution to science, to the Institute, and especially, to your colleagues. I hope you look back at your achievements here with satisfaction and pride, as we all do.

I would like to take this opportunity to thank our friends around the world, who continue to provide outstanding support to the Feinberg Graduate School. Their conviction that scientific education is the best investment of all has made the School’s ability to continuously nurture and promote its students possible.

I wish you every success in the future.

Prof. Daniel Zajfman, President
Weizmann Institute of Science
Dear Graduates and Guests,

It is now my great pleasure to welcome you to the 2016 Graduation Ceremony of the Weizmann Institute of Science. My heartfelt congratulations to all who are receiving their PhD and taking another step towards new scientific careers, as well as to the graduates of MSc programs, who are continuing on this road of scientific education.

Last year, we had the distinct honor to welcome author Meir Shalev as the keynote speaker for this ceremony. After the event was over, I received a letter from Mr. Shalev, of which I would like to share one quote. This is what he wrote:

“I have had the chance to speak in similar ceremonies in other places, but with you I felt the excitement of the teachers surpassing that of the parents…”

Indeed, he is “on to us”… The graduation ceremony of the Feinberg Graduate School is an emotional event for us, the faculty of the Weizmann Institute of Science, every single year – as if it were the first time. Each year we are filled with joy and great satisfaction with the accomplishments of our graduates. But not only are we happy about what they have already accomplished; we are also excited and curious to see them growing and becoming leaders in science, technology, education, and social action.

Upon receiving your MSc and PhD degrees, you hereby join a select group of the best and most productive minds in Israel and around the world. During your stay at the Weizmann Institute, you had the opportunity to witness groundbreaking research and expose yourselves to new horizons that mark the path for all humanity.

Antoine de Saint-Exupéry, author of “The Little Prince”, once wrote: “If you want to build a ship, don’t drum up people to collect wood and don’t assign them with tasks and work, but rather teach them to long for the endless immensity of the sea.”

How do you create a scientist? The “Little Prince” method works here as well… you instill love and passion for science and teach independent and creative thinking, along with the recognition of one’s personal ability to turn thought to action and dream to reality.

The curricular program at the Feinberg Graduate School provides, aside from the degree itself, the power of creative thinking, perseverance, and the ability to deal with complex problems. All these will undoubtedly yield significant outcomes in the future. I hope you will succeed in recognizing your abilities and pursue a better future for your home and country. True to our tradition here at the Weizmann Institute, we will continue to follow you wherever you go, to dispense sound advice, and to provide you with the support you need in keeping with our sense of social and professional responsibility for your future.

A special thanks is hereby sent to the families of each and every one of you, for raising you and encouraging you to strive for excellence, and for supporting you from a very young age and throughout the years.

In conclusion, allow me to bestow upon you, the graduates, the same blessing that King David wrote in Psalm 1:3, a blessing very relevant to this position here today:

“And he shall be like a tree planted by brooks of water, that brings forth fruit in its season; and whose leaf shall not wither; and whatsoever he doeth shall prosper.”

I hope that you succeed in whatever you and your colleagues decide to pursue in the future. Godspeed in your new path!

Prof. Irit Sagi
Dean, Feinberg Graduate School
Dear Graduates and Parents,

Every year I am deeply moved when I witness the graduates come up on stage in their gowns, as if they were my own children. And my children are here—those I have mentored throughout their master’s and doctoral degrees; those I have watched grow in the past few years. Each farewell is a difficult one for us, your teachers and advisors, but also a source of immense pride. The bond that we have established between us is one-of-a-kind. Together, we experienced both frustrations and joys; breakthroughs and failures. Nothing is more exciting than to make a new scientific discovery together, to realize that together, we have reached a new, previously unknown place. It is a unique experience imprinted in memory. The advisor-student bond is no fleeting connection; it is a bond for life.

To this day, I proudly keep track of the successes of my former students, and still consult with my former advisor.

I hope we have given you useful tools for the road ahead; that we have provided you with fishing rods and not fish. That we have taught you that the most important thing is to ask the right questions, and to never give up until you succeed. That without belief in one’s goal, it is impossible to succeed—in research or in anything of substance in life—because the road ahead is a rocky one.

We watch you with pride, and look forward to your successes. Some of you will return, as scientists and colleagues, and will most likely even take our place on this podium. Nothing would make us prouder.

I wish you the best of luck.

Chair, Scientific Council
Dear Graduates,

On behalf of the Weizmann Institute Alumni Organization, I would like first and foremost to congratulate all those who have joined the family of Weizmann Institute graduates this year and to wish you the best of luck for the future.

Many Weizmann Institute alumni hold senior posts and influential positions in Israel and abroad – a true source of pride for the Institute. A quarter of science PhD graduates in Israel are Weizmann alumni, and they greatly contribute to the country’s economic, scientific, and technological development.

The goals the Alumni Organization has set for the coming years are keeping in touch with Weizmann Institute alumni, creating a social and professional alumni network, and strengthening the Institute’s ties with Israel’s industrial and financial sectors.

I would like to take this opportunity to cordially invite you to visit our Alumni Organization website at www.weizmann.ac.il/alumni/ in order to register and update your contact details. During the registration process, you will be presented with the option of opening your personal alumnus e-mail address. Once you register, we will be able to keep in touch with you and send you Weizmann updates and news. We can also be found on Facebook and LinkedIn.

We welcome your ideas and initiatives for further strengthening the Alumni Organization as a meaningful and influential body.

I wish you all the best in your future endeavors and encourage you to keep in touch with us.

With gratitude to the supporters of the graduate studies program at the Weizmann Institute of Science

The Weizmann Institute of Science and the students and staff of the Feinberg Graduate School are grateful to our many friends throughout the world who have generously funded our graduate studies program.

The Weizmann Institute created five new Research Schools affiliated with its five Faculties to expand and enhance its graduate education. These strategic investments provide students with greater opportunities for personal development and independent research, expanded contacts with the international research community, and even greater exposure to world leaders in their fields.

The Lorry I. Lokey Research School of Biochemical Science was established by California entrepreneur and philanthropist Lorry Lokey in 2007. It provides students in biochemistry, at all levels, with the tools and opportunities needed to excel.

Two brothers, Maurizio from Geneva and Solo from Milan, and their families founded the Solo Dwek and Maurizio Dwek Research School of Chemical Science in 2008 to provide students in chemical sciences necessities such as laptops, software, journal subscriptions, and conference travel expenses.

Chairman of the International Board of the Weizmann Institute, financial wizard Mandy Moross of London, established the Moross Research School for Mathematics and Computer Science in 2009. The Moross Research School sponsors special guest lectures, student-led workshops, and other enrichment for students of mathematics and computer sciences.

The Ekard School of Biological Sciences was also established in 2009 with an anonymous donation from a member of the International Board. The Ekard School provides funding to attract guest lecturers and visiting scientists in emerging areas of biology.

The André Deloro Research School of Physical Science was established in 2013 by the Adelis Foundation, founded by French entrepreneur and philanthropist André Deloro. The Deloro Research School works in tandem with the André Deloro Institute for Space and Optics Research to explore the nature of the universe from the smallest particle to the most distant galaxies.

The David Lopatie Fellows

Up to ten David Lopatie Fellows in the MSc and PhD tracks are selected each year by the Dean of the Feinberg Graduate School, based on exceptional academic excellence. This prestigious award includes a first-year PhD scholarship and a personal travel allowance for scientific meetings, workshops, and schools.

These strategic investments provide students with greater opportunities for personal development and independent research, expanded contacts with the international research community, and even greater exposure to world leaders in their fields.

Scholarships are precious gifts—in essence, gifts of knowledge. They enable our students to concentrate on their studies, freeing them to devote their full energies to coursework and laboratory research. This steadfast encouragement has borne fruit in the many research scientists all over the world who began their careers at the Weizmann Institute of Science. Today’s graduates are tomorrow’s scientific leaders.
