# **THE FIRST INTERNATIONAL ISRAEL DATA SCIENCE INITIATIVE CONFERENCE**

Join us at the DS@DS - Data Science at Dead Sea Conference  
For a unique Deep Learning Experience at the Deepest Spot on Earth

The Israel Data Science Initiative is happy to announce its first international conference to mark the consolidation of the Data Science Research Centers that were established in 7 of Israel's research universities.

Through these centers, and under the coordination of the IDSI, researchers from core and satellite Data Science disciplines have begun to have an impact on research and education in Israel, on collaboration with industry, and on forging international ties.

The conference is open to presentations and posters from Israeli and international researchers and practitioners. Presentation and poster topics may include contributions from core DS fields such as AI, NLP, Statistics, ML, Deep Learning and from their applications to research in the biological, physical and social sciences as well as in the humanities.

**IDSI is Excited to host as Keynote Speakers:**

**Prof. Trey Ideker**  
University of  
California San Diego

**Prof. Bin Yu**  
Berkeley

**Prof. Ming Yuan**  
Columbia University

**Prof. Yoav Freund**  
University of  
California San Diego

**Abstract submission for oral presentation and poster session is now open!**
