### **Structural robustness of large games**

#### *Abstract*

This short survey discusses recent findings on the robustness of Nash equilibria of strategic games with many semi anonymous players. It describes the notion of structural robustness and its general consequences, as well as implications to particular games such as the ones played on the web and market games.

***The lecture will take place in the Lecture Hall, Room 1, Ziskind Building  
on Monday, December 25, 2006
