

Sir John Cowdery Kendrew 1917-1997

Britany

Nobel 1962

3D atomic structure of Myoglobin from whales, at 2Å resolution.
Founder and first head of the European Molecular Biology Organization
(EMBO lab, EMBL)

Different presentations of a three-dimensional structure of a protein:
Atomic bonds balls and sticks, Peptide chain path, and space filling model

In red: the heme group
that binds Oxygen
