

Instructions For Using A 12 Kg Powder Fire Extinguisher For Light Metals

1. The powder fire extinguisher is intended for use with light metal fires, such as: aluminum, magnesium, and alloys only!
2. Grab the fire extinguisher and bring it near the fire!
3. Make sure the pressure gauge is set to green!
4. Tear off the plastic cuff and pull out the guard!
5. Aim the hose at the center of the fire and press the operating handle!
6. Cover the fire with the powder.
Cover it fully to prevent oxygen from reaching the fire!
7. After use, replace with a new powder fire extinguisher!
