

Dear Mathematics and Computer Science Candidate,

In order to be able to properly handle your application, please provide us with the following information.

1. Which of the following best describes your academic background (select exactly one option):

- Pure Mathematics (Algebra, Number Theory, Analysis, Probability Theory, Geometry, Combinatorics)
- Applied Mathematics (Differential Equations, Numerical Analysis, Mathematical Physics, Dynamical Systems)
- Machine Learning / Artificial Intelligence / Computer Vision / Signal Processing
- Theoretical Computer Science (Complexity Theory, Cryptography, Algorithms)
- Computational Biology

2. Which of the following best describes your desired research area (select exactly one option):

- Pure Mathematics (Algebra, Number Theory, Analysis, Probability Theory, Geometry, Combinatorics)
- Applied Mathematics (Differential Equations, Numerical Analysis, Mathematical Physics, Dynamical Systems)
- Machine Learning / Artificial Intelligence / Computer Vision / Signal Processing
- Theoretical Computer Science (Complexity Theory, Cryptography, Algorithms)
- Computational Biology
- Undecided

If there are additional comments about your background and/or desired research field for example, if there is an additional subject in which you have a strong background please specify them below in 1-2 sentences (at most 150 characters). Please leave blank if no comments.
